New Dish Contest in Green City

We Want Your Ideas!

We are asking high school students to think of a new dish for restaurants in our city. The winner's dish will be served at the restaurants in October. When you create your new dish, we want you to

- use vegetables or fruits grown in our city in October.
- think about the environment.
- think of people's health.

On May 31, many cooks will watch your presentations, and the winner of the contest will be chosen. If you are interested in this contest, please call 012-9876-5432 before May 10.

Hello, everyone! We are Miku and David. We go to Green High School. We love this city. We will make pancakes with fruit jam. Let us tell you why we chose this idea. Our city has many fruit farmers, and a lot of fruit is produced here. As Slide 1 shows, various fruits are grown almost through the year. Actually, there is a big problem with them. Only fruit which looks good is sold in shops or supermarkets. Other fruit which looks bad is not sold. However, the fruit that looks (A) doesn't always taste (A). To think about the environment, we want to use it to make fresh jam.

Look at Slide 2. Though our city produced a lot of rice before, the amount of rice has been going down since 2005. We're very sad about that because it's very delicious. So, we want to introduce the rice from Green City to many people by making rice flour pancakes. Actually, some people say that cookies or bread made from rice flour are lower in calories and are safer for people with allergies. Our pancakes will be good for everyone's health.

Pancakes are loved by a lot of people around the world, so we hope many people will come to our city and eat our rice flour pancakes with (B) jam!

8 次の英文を読んで、あとの(1)~(4)の問いに答えなさい。

Dictionaries are very helpful tools that show you the meaning of words that you do not know. Many of you probably use electronic dictionaries, but paper dictionaries are still popular among people studying languages.

Sometimes, dictionaries must be revised. When a dictionary is revised, many new words are added to it and also some old words are deleted from it. There are usually more new words than old words. As a result, the revised paper dictionary becomes thicker than the old one.

In 2014, when an English-Japanese paper dictionary was revised, the new dictionary had 5,000 new words and 200 more pages were added. [ア] However, surprisingly, the new dictionary was as thick as the old one. What kind of new techniques were used to make the new dictionary?

If you want to make a book really thin, one way is to make the words on each page smaller, or the spaces between the words smaller. [イ] However, if the word size and the spaces between the words in the dictionary are smaller, they cannot be printed clearly or be read easily.

Another way is to make each piece of paper thinner. If you made a dictionary with the paper which your school teachers give you during class, it could become really thick and hard to use. However, if you use thinner paper, it is possible for words to show through. [ウ] So, dictionary companies tried to produce better paper many times and finally invented thin paper which does not show through.

When you look for a word in your dictionary, you have to turn many pages, so the pages cannot be too stiff. Also, if the pages of the dictionary are too stiff, it closes on its own and it is not helpful for people when they study with it. Companies have tried to make dictionaries thin and light and also useful for studying. One company solved the problem with a new technique. Now, when you turn the page, the paper is soft enough that the pages turn easily and two pages or more are never turned at the same time. [エ]

In this way, you can use a paper dictionary without any problems and learn languages with it well. Many ideas and techniques are included in one paper dictionary. When you use your paper dictionary, please remember this.
